SUMMARY

Web Developer with deep, hands-on experience across WordPress, PHP, and full-stack JavaScript, building and maintaining production website suites, custom themes/plugins, CI/CD pipelines, and backend integrations.

EXPERIENCE

Web Developer – Greenheart International

Jun 2017–Present

Chicago, IL (Remote)

- Built and manage the Greenheart site fleet (greenheartexchange.org, greenhearttravel.org, greenheart.org) – full design, development, theming, and backend integration
- Created the Greenheart core WordPress theme and plugins powering all business logic
- Own CI/CD pipeline via GitHub Actions, including automated testing and rollback
- Built and maintain integrations/automations connecting backend systems with intake forms, applications, and public-facing profiles

Freelance Front End Developer

2013–2017

Los Angeles, CA

- Designed and built websites for a variety of independent clients

Web Content Manager – iPR Software

Jan 2007–Sep 2013

Los Angeles, CA

- Managed content for several large clients, including Yahoo! and Target
- Provided CMS support and content work for iPR's clients

SKILLS

WordPress, PHP, HTML/CSS/JavaScript, React, REST/GraphQL/OAuth API integrations, CI/CD (GitHub Actions), LAMP stack, SQL, AWS infrastructure (Lightsail), MEAN stack, MongoDB, Figma, Adobe Creative Suite, SEO

EDUCATION

Lake Michigan College, Benton Harbor, MI – Coursework completed, 1998–2000
